Preface

The report that follows is a compilation and analysis of selected data reported by North Carolina public libraries for July 1, 1994, through June 30, 1995. The Federal-State Cooperative System (FSCS) report submitted to the National Center for Educational Statistics is generated from this data.

Included in this year's directory are four special tables: Five-Year Statewide Summary, "Top Ten" Libraries, Selected Statistics by Legal Service Population, and Statistical Summary Overview - North Carolina Public Libraries. These tables show comparisons for selected data elements or overviews of selected groups of data.

Table 1 of the 12 numbered tables is a profile table. It provides information about branches, bookmobiles, legal service population, square miles, annual hours, and friends groups. Some tables include statistics by 25,000 and 1,000 legal service populations to be consistent with the way FSCS reports data.

Within the tables, libraries are grouped by type (county, regional or municipal). Within each type, libraries are listed in descending order by legal service population. This is done to facilitate comparisons with other libraries serving a similar size legal service population.

Legal service population figures are from the 1994 North Carolina projections from the State Data Center. The national ranking data is based on *Public Libraries in the United States, FY 1993: Selected Data and Rankings by State*, FSCS, US Department of Education, National Center for Education Statistics, 1995. This is the latest data available from FSCS.

The use of N/A in this report means that the information was not reported to the State Library. Also note that the statistics represent the 1994-95 fiscal year while the directory lists the latest available information.

The Library Development Section always welcomes comments and suggestions. If you have suggestions about particular data elements, the tables, or this directory please contact any consultant in the Library Development Section.

The statistics are also available on diskette in Quattro Pro version 5.0. Additional copies of this publication as well as customized reports, presentation quality graphics, or other special tables are available on request.
